

Custom Console Colors

The console mode is available in all Orx based applications. And it can be customized. The default Console looks like this:

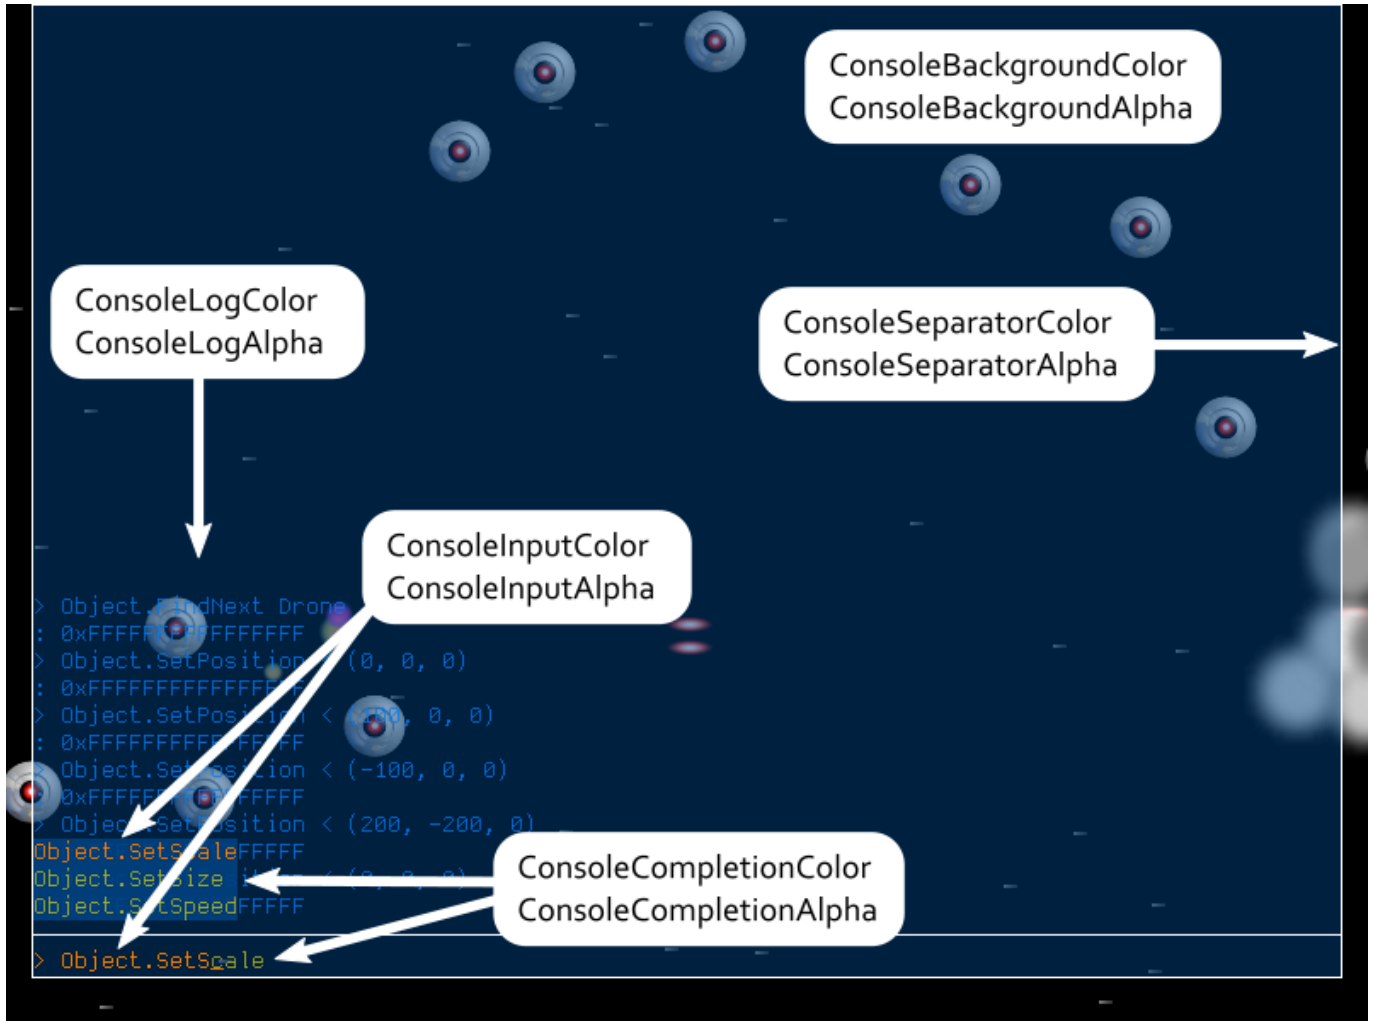

The entire set of properties available for the console are listed at: [Render Config Properties](#).

For convenience, they are listed (named like Console*) below as:

```
[Render]  
ShowFPS           = <bool>  
ShowProfiler      = <bool>  
MinFrequency     = <float>  
ProfilerOrientation = portrait|landscape  
ConsoleBackgroundColor = <vector>  
ConsoleBackgroundAlpha = <float>  
ConsoleSeparatorColor = <vector>  
ConsoleSeparatorAlpha = <float>  
ConsoleLogColor   = <vector>  
ConsoleLogAlpha   = <float>
```

```
ConsoleInputColor      = <vector>  
ConsoleInputAlpha     = <float>  
ConsoleCompletionColor = <vector>  
ConsoleCompletionAlpha = <float>
```

The following customized Console should easily illustrate which property changes which element within the Console:

And that's it. Super simple to change the console coloring.
